Problem: Upon upgrade to Solaris 10 update 11, jumpstarting a system with a flar created on a system with a separate zfs pool for /var yields an error:

cannot mount '/a/var': directory is not empty

ERROR: Could not mount dataset rpool/ROOT/BE_147147-26_0613/var

Could not mount dataset rpool/ROOT/BE_147147-26_0613

ERROR: Flash installation failed

Solaris installation program exited.
